Project Cotap

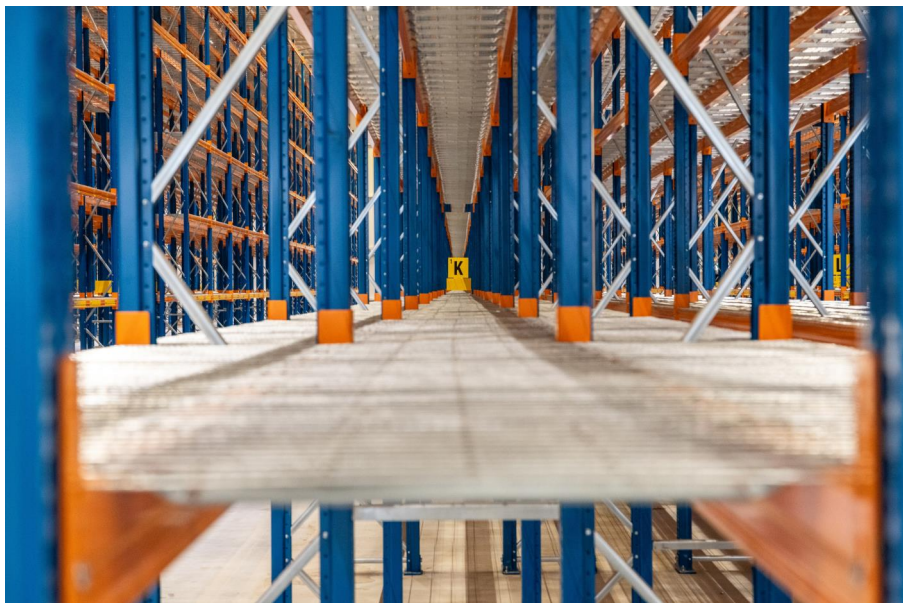

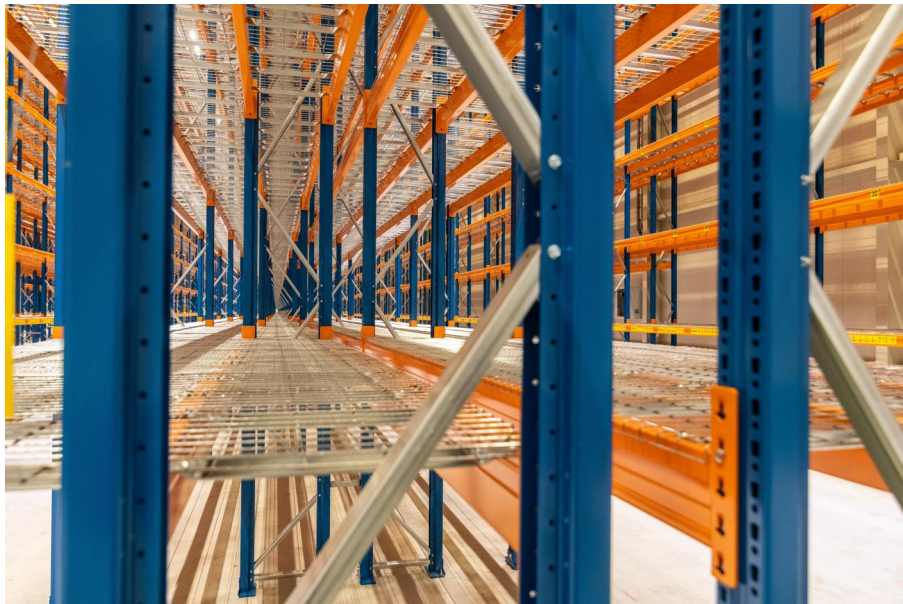

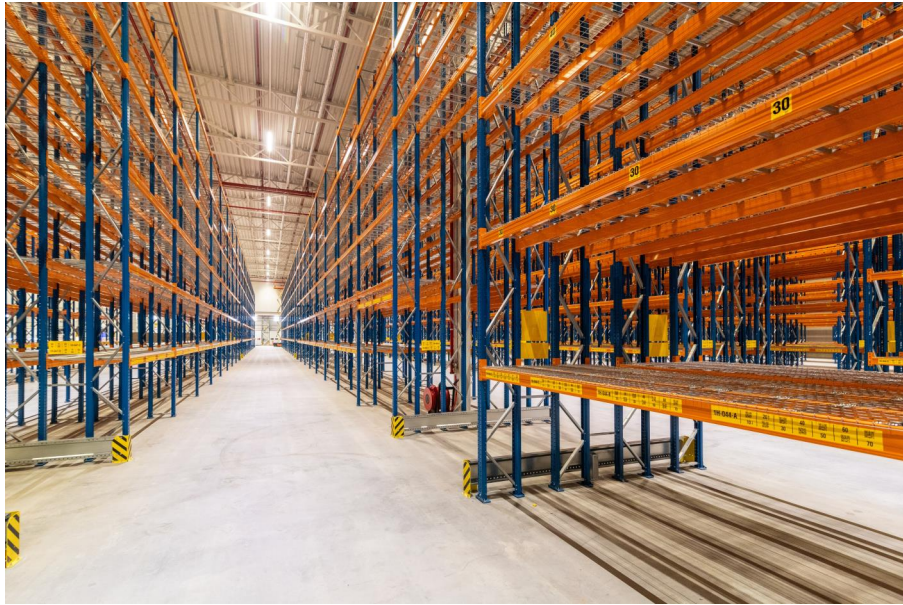

For the new distribution center of flooring specialist Cotap in Zwolle, we recently delivered a future-proof storage solution together with our reseller Magazijnplein and partner MonTac.

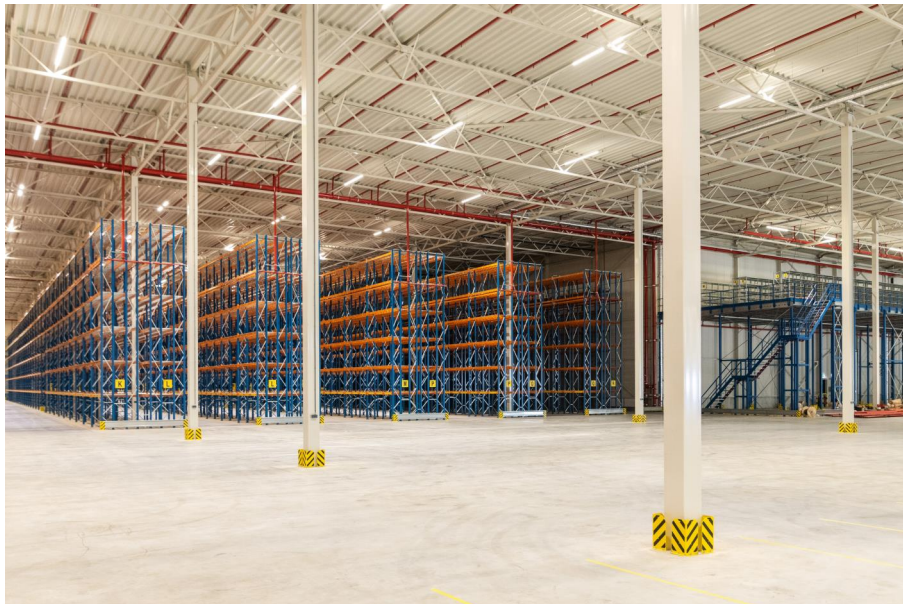

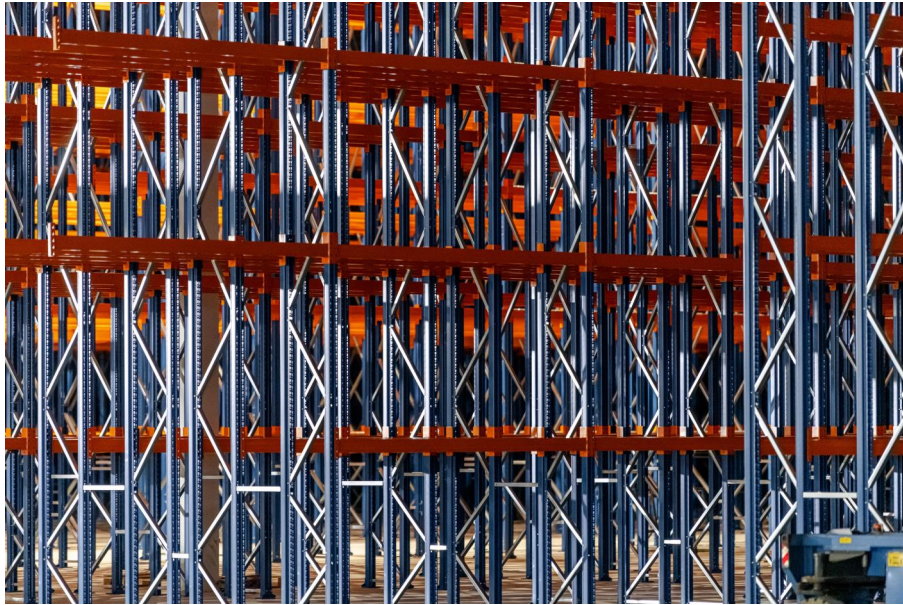

Cotap, a passionate family business celebrating 85 years in operation this year, offers a wide range of flooring products, including laminate, PVC, carpet and parquet.

Following a successful project in 2023, in which NEDCON supplied pallet racking, Cotap came back to us with a new request. In this second phase, we installed **23,952 pallet locations** and **950 shelving boards** in just 10 weeks. The pallet racking is designed for heavy loads of up to

3,750 kg per beam level and accommodates multiple pallet types thanks to a smart custom-made solution.

A great follow-up to our earlier successful collaboration with Cotap – and the request for yet another project is already in the pipeline!

Successful recertification ISO 9001 and ISO 45001

We're proud to announce that NEDCON Doetinchem has successfully completed the recertification audits for ISO 9001 (Quality) and ISO 45001 (Health & Safety).

Our certificates are renewed. This is an important confirmation that our management system meets the applicable standards. Over a course of eight days, the auditor conducted approximately 35 interviews and visited 2 sites. Both sites left a strong impression - processes were well organized and specifically highlighted as strength.

This recertification confirms that NEDCON continues to meet international standards for quality and safety, reinforcing our commitment to reliable operations and a safe working environment.

Discover our new corporate website

We are proud to announce that we launched a new corporate website, fully aligned with our new corporate identity.

Reseller pages

Our new website features fully redesigned Reseller pages. These pages offer several improvements:

- A clearer overview of our services.
- A clear explanation of what we stand for as a company and how we support our partners.
- Improved accessibility to our Reseller department. Getting in touch with our Reseller department has become even easier.

Introduction of the new SF ECO Divider: Now available for sale!

The graphic features the NEDCON logo (a stylized grid icon) and the text "a voestalpine company" on the left. To the right, the title "ECO SHELF DIVIDER" is displayed. Below the title is a table with two rows of product specifications. At the bottom, three bullet points highlight the product's features: "Easy to assemble", "Light weight", and "Sustainable with recycled PP board".

Divider Height	Shelf Depth	Delivery	Article Number
150	400	From stock	58431
150	600	From stock	58432

- Easy to assemble
- Light weight
- Sustainable with recycled PP board

In our April newsletter, we introduced our new ECO Dividers. These Dividers are made from recycled plastic, resulting in a very low CO₂ footprint. Additionally, they are 30% cheaper than our current Dividers.

The new Dividers are now included in our price list, available for order and in stock for immediate delivery!

Feature spotlight in CET Designer: 'Locate on Drawing'

Dear readers,

we all know the challenge: in large projects it can be difficult to keep track of where each item from the Bill of Materials (BOM) is located in the drawing. This is exactly where the **'Locate on Drawing'** function in CET Designer comes in.

What does 'Locate on Drawing' do?

With just one click, CET jumps from the BOM directly to the drawing and highlights the selected object. You instantly see where the corresponding element is placed – no more time-consuming searching.

Key benefits

- Quick orientation: Saves valuable time in large and complex projects.
- Increased accuracy: Prevents mix-ups between similar items.
- Better control: Verify immediately whether each item has been placed correctly.
- Improved communication: Perfect for project reviews and client presentations.

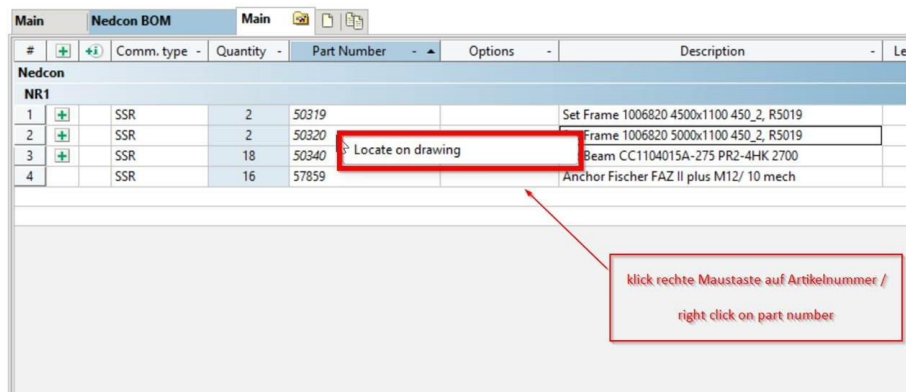

Things to keep in mind

- Model structure dependent: With duplicates or grouped items, locating may be more complex.
- Performance: In very large projects, the search may take a few seconds.
- CET only: Exported BOMs (Excel/PDF) do not benefit from this function.

Conclusion

'Locate on Drawing' is a real efficiency booster that makes your daily work much easier, especially in large projects. Try it out in your next project!

Tip: Screenshots of this feature can be found below.

Invitation to the Reseller Training

We are pleased to invite you to our Reseller Training from December 2nd to December 4th, 2025.

The training will be held in German – if desired, it can also be conducted in German/English.

Important information for participants:

- The training starts on Tuesday, December 2nd, 2025, at 09:00 a.m.

- We warmly invite you to join us for a *Come Together* on the evening before, Monday, December 1st, 2025.

Please register [here!](#)

When booking your travel, please keep in mind the early start on Tuesday morning.
