

# NEDCON Mezzanine Floors

**Want to create more space for your goods? You can use mezzanine or intermediate floors to quickly, cheaply and easily multiply the number of square metres of floor space available.**

The mezzanine floors from NEDCON can be set up according to your specific requirements. Whether you need an extra floor for storage, order picking, a conveyor belt or maintenance.

**If it can be done,  
consider it done**

## Advantages of NEDCON mezzanine floors

- Easily create more space for your goods
- Possible load bearing capacity of floors of 500kg/m<sup>2</sup> to 1500 kg/m<sup>2</sup> and more
- Large spans possible thanks to efficient profile use
- Easy to extend or disassemble
- Excellent integration with warehouse racks and automated systems
- Designed according to Eurocode 3 and national regulations
- Can be combined with pallet racks, flow racks and shelving systems
- Available with various finishes - in 6 to 8 weeks
- Available in all RAL colours

If it can be done,  
consider it done

Both the components and the complete structures of NEDCON mezzanine floors are extensively tested for, among other things, load bearing capacity and safety, and more than satisfy all standards and requirements applicable in Europe and individual countries. The standard floors can hold loads of 500kg/m<sup>2</sup>, but NEDCON can also supply floors capable of dealing with loads of 1500kg/m<sup>2</sup> and more. And depending on the floor you choose, spans of 10 metres are easily achievable.

### **Masters of customisation**

NEDCON's rock solid mezzanine floors are easy to extend or disassemble (in parts). And they have even more strong points. For example, NEDCON succeeds exceptionally well in making seamless transitions between its mezzanine floors and racks. Better safe than sorry. In addition, NEDCON outshines other suppliers in the integration of its floor systems with, for example, conveyor belts or lifts. NEDCON is the right place to go for custom solutions and 'specials' in the field of mezzanine floors.
